Verification of AI management system

We confirm that we have assessed the management system of Zensai International ApS and verified its compliance with the requirements of ISO/IEC 42001:2023.

Our assessment confirms that Zensai International ApS has established a structured approach to the responsible development, implementation, and use of artificial intelligence (AI), addressing relevant risks, opportunities, and applicable legal and regulatory requirements.

Implementing an AI management system is a strategic choice for Zensai International ApS, as it supports the organization's commitment to responsible AI governance, continuous improvement, and sustainable innovation. This commitment is further demonstrated through structured risk management processes, clear accountability, and systematic monitoring of AI-related activities.

The management system is certified in accordance with ISO/IEC 27001:2022 and ISO/IEC 27701:2019, and we confirm that its scope has been expanded to fulfill the requirements of ISO/IEC 42001:2023.

We reassess compliance through an internal audit once a year. Therefore, this verification remains valid until October 10th, 2027.

Kolding, October 10th, 2026

Pernille Krogh Hansen
CEO
